

# Practice Quiz: Introduction to Python

Total points 5

## Question 1

**Fill in the correct Python command to put "My first Python program" onto the screen.**

1 / 1 point

```
1 print("My first Python program")
```

My first Python program

Correct

Way to go! You've given the computer the correct instruction in Python to do what you've asked of it.

## Question 2

**Python is an example of what type of programming language?**

1 / 1 point

Platform-specific scripting language

Machine language

General purpose scripting language

Client-side scripting language

Correct

You got it! Python is one of the general purpose scripting languages that are widely used for scripting and automation.

## Question 3

**Convert this Bash command into Python:**

1 / 1 point

```
1 print("Have a nice day")
```

Have a nice day

Correct

Great job! You used the correct syntax, with proper punctuation, to make this code work in Python.

#### Question 4

**Fill in the correct Python commands to put "This is fun!" onto the screen 5 times.**

**1 / 1 point**

```
1 for i in range(5):  
2     print("This is fun!")
```

This is fun!  
This is fun!  
This is fun!  
This is fun!  
This is fun!

Correct

Well done! You remembered how to specify the range in Python, and have the "print" command do the work.

#### Question 5

**Select the Python code snippet that corresponds to the following Javascript snippet:**

```
1 for (let i = 0; i < 10; i++) {  
2     console.log(i);  
3 }
```

**1 / 1 point**

```
1 for i in range(10):  
2     print(i)
```

Correct

Right on! In Python, we use range() to initiate for loops.
